

# Our Path Toward SUSTAINABILITY

## MATERIALS SELECTION:

Compliant with the following regulations:

1. RoHS3
2. REACH (EC 1907/2006)
3. California Proposition 65
4. Dodd-Frank Wall Street Reform and Consumer Protection Act Section 1502 (Conflict Minerals)

## MANUFACTURING PROCESS:

66% of power for TwitchView System manufacturing (located in Washington State) derived from renewable hydroelectric power.

58% of power for manufacture of TwitchView electrodes (located in Iowa), derived from renewable wind power.

## DEVICE DESIGN:

Device designed for **10+ YEARS** of service using high quality plastics and electronics and use of rechargeable lithium-ion battery.

## PACKAGING:

Converted from foam insert to 100% recycled cardboard shipping boxes.

## DISTRIBUTION:

Acquired warehousing facilities at major hubs to minimize long distance transport (Iowa, Measham, Seoul, Tokyo, Turin)

Switched from air to land and sea-based transportation to minimize end user cost and environmental impact

## DISPOSAL:

Refurbish TwitchView Systems & recycle components

Minimized packaging size for device and disposable electrodes
